

E: Klinge Road: Commissioner Blum updated everyone about the Commission's appraisal of where things are after the Commissioners' meeting with Bill Shields the Superintendent of Rock Creek Park and DPW's chief engineer Sandy Vinick for the Klinge Road project as well as on her meeting with the Klinge Valley Association (KVA) regarding the reopening of Klinge Road. Basically, **the Commission is awaiting more fact finding from D.P.W.**, which is continuing to assess the situation. Commissioner Wamsley pointed out the discrepancy between what the Commissioners were told by Mr. Vinick during their meeting with him and the contradictory information given to the Klinge Valley Association by Gary Burch, engineering and construction administrator for DPW. Bob Katzman, a representative of KVA, stated that he was informed in a letter from D.P.W.'s Gary Burch that consideration is being given to whether the contract can be separated.

Transportation Committee Chair Charles Warr also reported on the Klinge Road issue and his belief that no decision would be made before the first of the year.
